

ISO SIMPLE CABLE

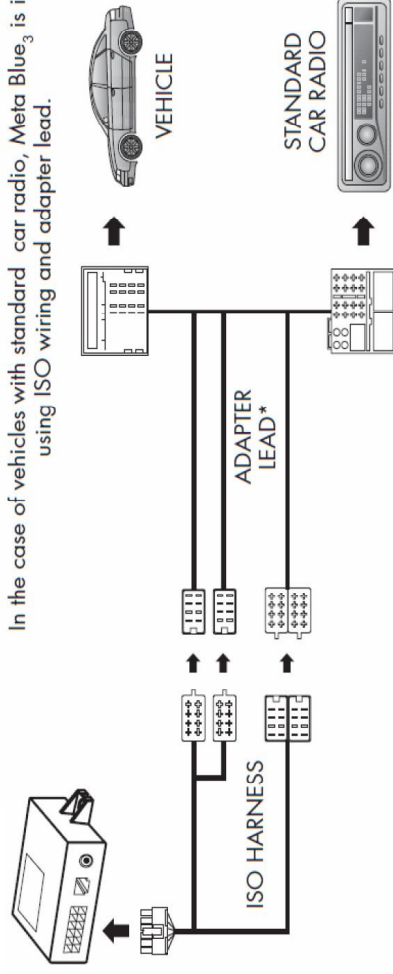

Meta Blue₃ can also be installed on vehicles with aftermarket radio by means of ISO wiring.

Base kit include this ISO cable. When "No additional cable" reported, it is not necessary to use other optional harness to install METABLUE2.

OEM to ISO CABLE

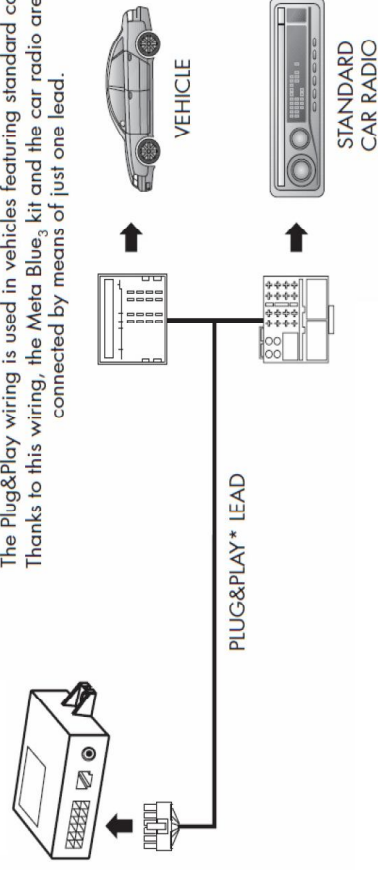

In the case of vehicles with standard car radio, Meta Blue₃ is installed using ISO wiring and adapter lead.

OEM to ISO Cable. Use dedicated harness to install METABLUE2 in your car.

PIN to PIN Simple Cable

The Plug&Play wiring is used in vehicles featuring standard car radio. Thanks to this wiring, the Meta Blue₃ kit and the car radio are directly connected by means of just one lead.

METASYSTEM COMPLETE CARS LIST AND CABLE-HARNESSES 2009
