

NHTSA Recall 4404/50

Affecting the headlight system on early car's

Alfa Romeo, Inc. Headquarters 250 Sylvan Ave., Englewood Cliffs, N.J. 07632 (201) 871-1224		Group 40 Info 1 Campaign 4404/50 Subject HEADLIGHT WIRING MODIFICATION Date MAY 12, 1988
---	---	---

RECALL CAMPAIGN NO. 4404/50
1987-88 ALFA ROMEO MILANOS
HEADLIGHT WIRING MODIFICATION

VEHICLES: All 1987 and some early 1988 models.*

CONDITION: Possible loss of headlamp illumination due to deterioration of electrical contact at the power feed terminal of the headlamp switch and subsequent deformation of switch body.

REMEDY:

- A. Replacing the terminal connector of the power feed wire to the headlamp switch with a superior design, phosphorus-bronze plated, female spade connector.
- B. Thorough inspection of the headlamp switch in the power feed terminal area to detect any deformation of the switch body, replace switch if necessary.
- C. Installing a relay to carry power to the low beam headlamps to reduce the load on the headlamp switch power feed terminal.

PARTS:

- A. Headlamp modification kit Part No. 8500 60897350 containing:

<u>DESCRIPTION</u>	<u>QUANTITY</u>
Headlamp modification wiring harness	1
Headlamp relay	1
Phosphorus-bronze plated connectors	2
Protective insulating sleeve	1
Recall sticker	1
- B. Open-barrel crimping tool, one sent to each dealer. Replacements available under Part No. 8501.

*Owners of vehicles within category of affected vehicles will be sent the attached owner notification and dealer modification voucher. Master list on file at ARI.

COST: A. Headlamp Modification Kit, Part No. 8500.

1. An initial supply of headlight modification kits will be shipped to your dealership. Your Parts Account will be charged accordingly for each kit.
Dealer Net: \$10.52
Sugg. Retail: \$12.37

2. Additional kits must be ordered through your Parts Department.

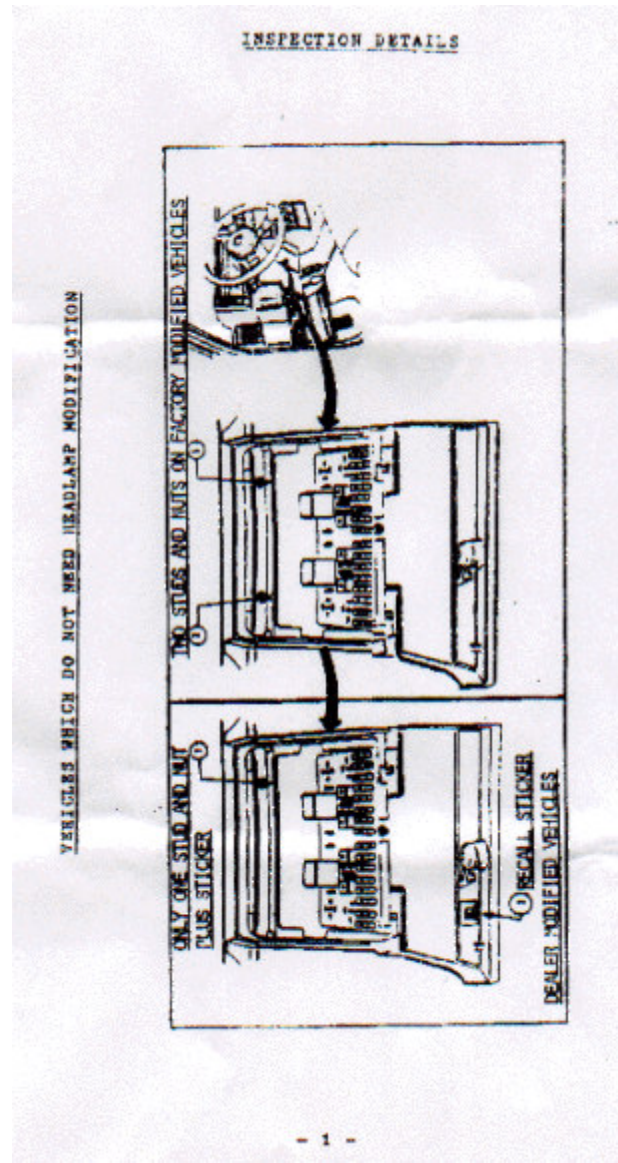

B. Open-barrel crimping tool Part No. 8501.
